[HttpGet]

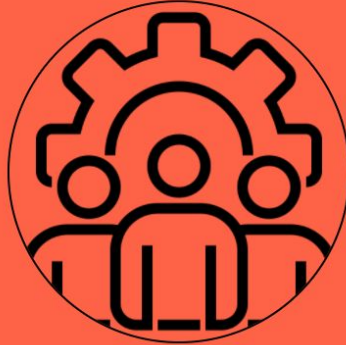

```
public ActionResult AddOrEdit(int id=0)
{
    WebRegister webModel = new WebRegister();
    return View(webModel);
}
```

[HttpPost]

```
public ActionResult AddOrEdit(WebRegister webModel)
{
    using (TrainingTrackingEntities db = new TrainingTrackingEntities())
    {
        if (db.WebRegisters.Any(x => x.Email == webModel.Email))
        {
            ViewBag.DuplicateMessage = "Account Already Exists";
            return View("AddOrEdit", webModel);
        }
        db.WebRegisters.Add(webModel);
        db.SaveChanges();
    }
    ModelState.Clear();
    ViewBag.SuccesMessage = "Registration Succesful";
    return View("AddOrEdit", new WebRegister());
}
```

Here is our AboutUs page.

### What Does this program Provide?

This program provides tracking of Courses and Employees.

### How To Use the Program ?

In the top navigation bar we have RegisterCourse section in that page you can easily change your course, edit your information as well.

You can register in top navigation as well with the Register button.

You can view your profile and get information about your account in the UserProfile part.

Here is our UserProfile page.
